

## • PROFILE •

I am a dedicated and goal-oriented web development student with a background in operator work, who has recently transitioned into web development.

I felt the need for something new and more challenging. During my studies, I have gained not only theoretical knowledge but also practical experience by creating and implementing web applications and developing user-friendly solutions.

## ONGOING EDUCATION

I am currently studying web development with a focus on e-commerce at Medieinstitutet in Alvik. During the program, I have gained a solid foundation in web technologies for creating responsive and user-friendly websites.

I have also developed an understanding of how to structure and optimize web applications to ensure a strong user experience. At present, I am continuing my learning by deepening my knowledge of various frameworks and technologies such as JavaScript, TypeScript, and React.

## 🎓 EDUCATION

- Web Development in E-Commerce – Medieinstitutet Higher Vocational Education  
August 2024 – May 2026
- Media Program, Cybergymnasiet Odenplan  
2007–2011
- Kunskapsskolan Tumba, 9 years  
1998–2007

## 📁 WORK EXPERIENCE

- Operator, Machine & Print Production  
Xerox Sverige AB 2016-01-01 - 2024-01-06
- Operator, Small-Scale  
CGI 2012–2016

## JOB RESPONSIBILITIES

I was responsible for ensuring that my part of the production was delivered according to schedule and SLA. I developed and coordinated delivery reliability in collaboration with production planning and customer support functions, and I assisted in incident management.

My role also included further developing routines and methods to improve efficiency within the team's area of operations. In addition, I implemented new routines and work procedures while ensuring that processes and regulations were consistently followed in daily operations.
